- Full color throughout
- Life cycle from birth to adult
- Glossary and range map
- Raccoon name and timeline
- Raccoon relatives and statistics
- Approved handling techniques
- Approved temporary diet recipes

Beginning with an inside-the-den look at the birth of three cubs, Willis describes a year in the life of a raccoon family as the mother teaches her cubs to climb trees, find food and escape predators. This fun and educational life cycle book teaches children about one of North America's most intelligent and ubiquitous animals. Big, eye-catching colored pencil illustrations portray the cubs learning to catch a frog and eat a fiddler crab. Clear text describes how raccoons learn to swim and search for a winter den.

Raccoon Moon is a "must-have" for any juvenile nonfiction collections. *Karen Quinn, Corbit-Calloway Library*

Willis allows us to see the clown, the family, and the intelligent creatures raccoons really are. *Bonnie Kruch, Wildlife Rehabilitator*
